

## AGRICULTURE

### **FLORIDA AG IN THE CLASSROOM (Grades K - 12)**

This multi-disciplinary curriculum instills an appreciation of the social, environmental, and economic impact of our nation's most important industry. Students learn how a commodity becomes a product, careers in agriculture, and the science of growing crops.

**Florida Ag in the Classroom, Inc. offers two sets of curriculum supplements, KFG & PFLP.** Six hours of required training provide educators with in-depth knowledge of the curriculum enabling effective use of the program.

**KEEPING FLORIDA GREEN (Grades 6 - 8)** KFG science based and interdisciplinary in science, social studies, language arts and math. Sunshine State standards are listed in each lesson.

**PROJECTS FOOD, LAND AND PEOPLE (Grade K - 12)** FLP USA program is the only nationwide K - 12 agricultural environmental education curriculum project in existence. FLP exists to meet critical needs in education identified by professional agriculturists, natural resources specialists and educators.

**Resources:** Lesson plans, possible field trips, guest speakers, and grants.

**ALL ABOUT ANIMALS (Grades K-3)** Youth learn the essential components of caring for animals, with a focus on companion animals. Topics include: what is an animal, how animals serve humans, care, health, nutrition, welfare, and understanding production of animals.

**Resources:** Teacher/leader guide, student workbooks, and certificates.

### **WORLD OF ANIMALS (Grades 4-6)**

Students gain a complete look at the world of animals around them (including pets): what is an animal, animal care, animal nutrition, harvesting animals, how animals serve humans, animal health, animal welfare, marketing and economics, and how animals affect the environment.

**Resources:** Teacher/leader guide, student workbooks, and certificates.
