

HORTICULTURE LEARNING CENTER

4-H CHILDREN'S GARDEN

The Collier County 4-H Youth Program is part of the Extension of the University of Florida, Institute of Food and Agricultural Sciences, and the Public Services Division of Collier County Government. 4H serves youth ages 5-18 throughout the county. Extension helps people find practical solutions to problems that are specific to living in Florida. The fact that we are the largest adult education and youth development organization in the world is the reason people find us so valuable.

There is no fee for our programs. If the need to charge arises, it will only be for the actual cost of the materials. Some curriculum notebooks can be purchased at cost, or they can be borrowed from the 4-H resource library at the Extension office.

Don't miss a great opportunity to visit our Horticulture Learning Center. This Center is divided into a number of small space "theme" gardens, each in scale with and containing elements of a residential setting. One garden we are proud of is our 4-H Children's Garden - a learning playground where kids of all ages can explore the world of plants through utilization of the 4-H Head, Heart, Hands and Health.
