## Join Us in January at the Garden Workshop Series

*By Kris Morton, Master Gardener and GWS Co-Chair*

As each New Year approaches, we strive to turn gardening challenges into enjoyable results. Attendees of last year's Garden Workshop Series challenged our committee with suggestions for future topics. And after weeks of preparation, we hope you will enjoy the interesting and diverse topics we've planned for our 2012 Educational Garden Workshop Series.

The 2012 Series is once again being co-sponsored and held at **Unity of Naples, 2000 Unity Way**. The Series **begins on Thursday, January 12th**, with each presentation scheduled **from 10:00—11:30 a.m. each Thursday through March 15th**. The complete Series schedule is available on page 3.

We begin on **Thursday, January 12**, with **Designing and Growing Container Gardens** by Paula Braida. Paula is a Master Gardener, Naples Garden Club member, and [Naples Botanical Garden \(NBG\)](#) Visitors Center Manager. She will discuss how to creatively decorate your home, lanai, condo and balcony using containers, sharing her design strategies and gardening secrets.

On **Thursday, January 19**, Brittany Patterson Weber and Master Gardener Leah Ray will deliver **Expressing your Garden's Personality with Art**. Brittany, Coordinator of the NBG's Vicky C. and David Byron Smith Children's Garden, will share her experience planting the Hidden Garden and using uncommon artworks. Leah will show us how to create unique, artistic stepping stones for our gardens.

SW Florida News from the Master Gardeners

## Gulf Currents

*By Mary Jane Cary, Master Gardener and Green Gazette Editor*

We're ringing in the season with a new Green Gazette Design! Thanks to all Collier Master Gardeners who voted the "plant and friend" design theme onto our cover. Enjoy quality gardening events and news you can use in font colors that are easy on your eyes *and* your printers. And in future issues, Master Gardener and graphic artist Ginger Peeler will introduce us to more of our South Florida plants and friends.

The late October rains did not dampen the success of our 10th Annual Yard and Garden Show. Thanks again to all of our attendees, vendors, speakers, 4-H volunteers and Master Gardeners who created a memorable show.

In the New Year, we'll be bringing you UF's next-generation Extension Service, the results of a year-long strategic planning endeavor. For an inside look at this process, visit UF's [Extension Long Range Plan](#). So join us in January for the Garden Workshop Series, where we'll learn and grow together!

## Join Us in January at the Garden Workshop Series

*Continued from Page 1*

Jennifer Hecker will encourage us to **Become Water-Wise** on **Thursday, January 26**. Jennifer, recognized as one of [Florida Weekly's](#) "2011 Power Women," is Director of Natural Resource Policy at the [Conservancy of Southwest Florida](#). She will enlighten us with tips on how to manage one of our most precious SW Florida natural resources.

On **Thursday, February 2**, Dr. Jan Abernathie, Naples Botanical Garden's Horticulturist and Botanist, will share his vast knowledge on **Plant Propagation and Bamboo**.

And on **Thursday, February 9**, Horticulturists and growers David and Jenny Burd, also known as "The Friendly Burds," will share their experience with **Tropical Fruits**. The Burds are [Collier Fruit Growers Council](#) members, partners with the Fort Myers-based [Educational Concerns for Hunger Organization \(ECHO\)](#), and one of the many Naples [Third Street South Farmers Market](#) vendors. With the decline of citrus production here in Southwest Florida, they will introduce us to some terrific alternative tropical fruits to grow and enjoy.

In the February Green Gazette, we'll showcase the second half of the Series, which includes Debbie Wyatt-Stotter on **Growing Roses in SW Florida**, John Sprinkle on **Water Gardens**, Rege Malone on **Tropical Gardening**, Dennis Cathcart on **Beautiful Bromeliads**, and concluding with a tour of one of Naples's oldest private gardens. (Tour for Series card holders only. Limited space available).

## The Frugal Gardener

*By Leah Ray, Master Gardener*

One of my gardening friends declares the day after Thanksgiving "Green Friday," and begins planning and creating holiday decorations for her home, and inexpensive gifts that her family and friends cherish (myself included). Here are a few of "our" favorites.

**Think Environment, Economy and Community** when selecting Christmas greenery. **Environment** — Consider a living tree, such as the native [Southern Redcedar](#) or [Sand Pine](#). Visit [UF's Christmas Tree Site](#) for tips to selecting and maintaining safe, environmentally-friendly decorations. **Economy** — [Visit a Florida Christmas Tree Farm](#) to select your favorite greenery! Many offer potted, pre-cut, and choose-and-cut trees. Some also offer wreaths, arts and crafts, gifts, and activities like hay rides. **Community** — By purchasing your holiday trees from a local charitable organization, your dollars have a positive impact on our community. Each action we take creates a "Pay it Forward" moment...

**Create a "Greenery" Gift** Dress up red or green [bromeliads](#) in a colorful container, or wrap pots with cellophane, fabric or raffia. Visit [UF's Gardening in a Minute Alternative Holiday Plants](#) for more unusual plant ideas.

**Create your own decorations** Use Copperleaf 'Irish Petticoat' foliage (shown here), or try these [UF Holiday Arrangement suggestions](#).

**Give a Perennial Gift** Gardeners can ALWAYS use another pair of gloves or some new pruners, particularly now when it's great to be outside. And rainy summer afternoons are a good time to enjoy a UF gardening book or CD from the Extension bookstore.

Or do you, your family members or friends enjoy exploring places that Mother Nature or someone *ELSE* maintains? Gift memberships to [SW Florida natural areas](#), [Collier county parks](#), and [public gardens and zoos](#) can be just the ticket to creating lifetime memories and preserving these special places.

**Merry Christmas and Happy New Year!**

Email your favorite thrifty tips to the Frugal Gardener at [CollierMG@ifas.ufl.edu](mailto:CollierMG@ifas.ufl.edu)

## 2012 Educational Garden Workshop Series

Each session held from **10:00—11:30 am** at **Unity of Naples, 2000 Unity Way**.  
**Cost** is \$ 7 / session or \$ 25 for the entire series. Pre-registration is not required.  
Visit the Collier County Extension Website at <http://collier.ifas.ufl.edu> for more information and to purchase tickets in advance by mail.

For further information contact the Collier County Extension Office at **(239) 353-4244**

Thursday, January 12, 2012

### **Container Gardening Concepts and Designs**

Paula Braida, Naples Botanical Garden,  
*"Jazz up your outdoor areas with container gardens."*

[UF Publication ENH1095 Container Gardens for Outdoor Spaces](#)

Thursday, January 19, 2012

### **Give Your Garden Personality with Uncommon Art**

Brittany Patterson-Weber, Naples Botanical Garden, Leah Ray, Master Gardener  
*"Gardens aren't just about plants. Unique and creative additions to your garden or lanai."*

[UF's Gardening in a Minute — Using Garden Art](#)

Thursday, January 26, 2012

### **Are You Water Wise?**

Jennifer Hecker, Director of Natural Resource Policy, Conservancy of SW Florida  
*"Water, water everywhere & not a drop with which to garden. Why an area with some of the highest rainfall in the country has to impose annual watering restrictions."*

[UF Publication AE287 Home Irrigation for Water Conservation](#)

Thursday, February 2, 2012

### **Bamboo & Propagation**

Dr. Jan Abernathie, Naples Botanical Garden Horticulturist, Botanist  
*"A renowned botanist shares his vast knowledge of plant propagation & bamboo."*

[UF Publication HS548 Bamboo](#)

Thursday, February 9, 2012

### **Tropical Fruits**

David & Jenny Burd, Horticulturists  
*"Alternative ideas for growing tropical fruits here in SW Florida, presented by successful local growers."*

[UF's Fruitscapes Website](#)

Thursday, February 16, 2012

### **Growing Roses in SW Florida**

Debbie Wyatt-Stotter, ARS Horticulturist, Arrangement Judge & Consulting Rosarian  
*"A passionate rose grower & native Floridian will share information about roses that grow for her, along with rose culture."*

[UF Publication CIR344 Growing Roses in Florida](#)

Thursday, February 23, 2012

### **Water Gardens**

John Sprinkle, Water Gardens Expert & International Koi Judge  
*"Add beauty & serenity to your garden. Learn about different types of water gardens, along with plants that can be used."*

[UF Publication CIR912 Creating Wildlife Habitat with Native Florida Freshwater Plants](#)

Thursday, March 1, 2012

### **Tropical Gardening**

Rege Malone, Horticulturist  
*"Turn your garden into a lush tropical landscape."*

[South Florida Native Plants Library](#)

Thursday, March 8, 2012

### **Beautiful Bromeliads**

Dennis Cathcart, Tropiciflora  
*"Dennis will introduce bromeliads to the novice & provide beneficial growing information to all bromeliad lovers."*

[UF Publication ENH1071 Bromeliads at a Glance](#)

Thursday, March 15, 2012

### **Garden Tour**

**Series Card Holders Only. Space is limited. Sign up required by March 1, 2012**  
*"Tour one of Naples' oldest exceptional & extensive private gardens."*

[UF's Gardening in a Minute — Demonstration Gardens](#)

## Top Zone10 Performers

By Mary Jane Cary, Master Gardener

**“Nature gives to every time and season some beauties of its own...”** Charles Dickens

Since August 2010, this column’s author, Master Gardener Faye Hunt, has acquainted us with a variety of trees and ornamentals that perform well in our Zone 10 climate, regardless of the season. But right after the Green Gazette bid Faye a fond farewell from her column-writing, a very different type of top Zone 10 performer grabbed our attention. Yes, Virginia, the [UF IFAS Fort Lauderdale Research and Education Center \(FLREC\)’s Trial Gardens](#) is identifying **annuals** that are Top Zone10 Performers for us!

Spring 2010 South Evaluation Plot

Under the leadership of Dr. Kimberly Moore, Professor of Environmental Horticulture, the FLREC Trial Gardens conduct unbiased evaluations of bedding plant performance in their South Florida environment. In this climate, spring and summer-flowering plants can be grown year round, making the Trial Gardens a great place for companies to determine how their plants will perform before summer arrives for our northern neighbors. This all-volunteer-supported garden is also unique in that it is the only facility in Florida conducting research on annual bedding plants.

Dr. Moore and her research assistant Luci Fisher begin the research process by confirming the [Trial Garden site conditions](#), including climate, soil characteristics, and presence of nematodes and root insects. They receive plant cuttings from growers, and by their own admission, plant and care for them using “typical homeowner methods.” This means they use no soil amendments, but they do apply a controlled release fertilizer at planting, following the label directions. They plant the cuttings in several full sun locations around the site, which are then mulched, and watered using overhead irrigation. Care includes periodic weeding by hand, but no dead-heading spent blooms or performing other maintenance!

Still, Dr. Moore has a few lessons-learned tips for growing annuals successfully using this minimalist gardening style. First, plant your annuals a little later, in the November—February time frame, fertilizing them at planting time with a controlled release product. In addition, be sure to water as you plant them, continuing until they are established. AND THEN, reduce watering to once weekly! For those doubters among you, the annuals in the trial garden photo above are the result of following all of these tips, including the once-weekly irrigation. Enough said.

Plants are evaluated monthly for plant height, width, flower number, and quality. Photographs of each cultivar are taken, and along with the data, are used to document the plants’ seasonal performance. The data and photos are then shared with the growers and published on the [Trial Gardens website](#). Through their efforts, Dr. Moore and her team have identified a number of annuals that meet our Top Zone10 Performer criteria for seasonal plantings. So from time to time in this column, beginning with this one, we will showcase one of their top performers.

**Phlox Intensia Blueberry** is a 2011 Proven Winners patented hybrid of a phlox that is native to North America. This drought and heat tolerant annual enjoys full sun, well-drained locations in Hardiness Zones 10 and 11, yet can withstand cooler temperatures to 30° F. This variety has a mounding habit 10—12” high, and will spread almost as wide. Striking blue-purple flowers above green foliage. Unlike some phlox varieties, this cultivar is self-cleaning, so dead-heading is not necessary. Dr. Moore’s team observed plenty of butterflies enjoying the flowers. But if you have rabbits in your neighborhood, they may find this phlox rather tasty as well.

Phlox Intensia Blueberry

Seven other Phlox Intensia color varieties include: Cabernet (dark pink blooms), Lavender Glow (Lavender), Neon Pink (hot pink), Orchid Blast (medium pink), Pink (light pink), Star Brite (pink and white), and White (white blooms). Look for Phlox Intensia varieties at local home improvement and independent garden centers, and enjoy a bright Top Zone10 Performance season!

## A Gift that Keeps on Giving

Courtesy of Florida Friendly Landscaping Principle # 5: Attract Wildlife

By Mary Jane Cary, Master Gardener

The Dahoon Holly and Sabal Palms in the photo at left are in our family's backyard near the lanai, but we don't own them. When we moved in six years ago, we were informed by our neighbors, the Mockingbirds, that this tree and palms are *their* property. They live, work, shop for food, raise their kids, and entertain friends here. But they agreed to share the area with us, and we now have quite an arrangement. We maintain a safe and healthy environment with shelter, food, and water for them and their friends. And in return, we enjoy free pest management and security services, daily concerts and entertainment.

### Create Shelter

Maintaining a variety of plants in your yard not only provides you with a lovely view, they provide refuge for wildlife seeking shade, rest, food and water. And clumps (or islands) of plants of differing heights create inviting rest stops and shelter for birds and butterflies, and small animals like squirrels and rabbits.

Planting Florida Friendly natives, like this [Dahoon Holly \*Ilex cassine\*](#), with the nearby [Cabbage Palm \*Sabal palmetto\*](#) surrounded with [Fakahatchee Grass \*Tripsacum dactyloides\*](#), assure year-round beauty and low maintenance for you, and premier real estate for our feathered and furry friends. In addition, creating "landscape islands" across your yard's open areas means less mowing for you, and greater safety for animals. After all, animals seek shelter during storms, and those that must cross large open areas are at greater risk from predators! The [UF IFAS Florida Friendly Plant List](#), which is also available as an [online searchable Florida Friendly Plant Database](#), recommends trees, shrubs, grasses, flowers and groundcovers that attract birds, butterflies, and hummingbirds. To attract specific butterfly species, [UF article ENH1160 ButterflyScaping](#) identifies host and nectar species, and the specific butterflies that use them.

### Provide an Organic Food Buffet

Great food sources for wildlife include berries, fleshy fruits, seeds, tasty leaves, acorns, nuts...and insects! Many of the plants identified in the plant publications above offer these treats, except the insects, which come with your property! And if we grow this food using organic methods, which means following [Florida Friendly Landscape principle #6](#), the birds, dragonflies, frogs, anoles, and predatory insects will provide their pest management services for free! Just remember, this means that you must be willing to allow your some of your fruits, foliage and

flowers to be eaten by the birds, larval butterflies or caterpillars, and adult butterflies! For more information, visit [UF's Gardening for the Birds website](#), and see [UF article CIR1429 Landscaping for Wildlife](#).

### The Nine Florida Friendly Landscaping™ (FFL) Principles

1. [Right Plant, Right Place](#)
2. [Water Efficiently](#)
3. [Fertilize Appropriately](#)
4. [Mulch](#)
5. [Attract Wildlife](#)
6. [Manage Yard Pests Responsibly](#)
7. [Recycle](#)
8. [Reduce Storm Water Runoff](#)
9. [Protect the Waterfront](#)

See the new **Articulate E-Learning**  
[Nine FFL Principles Presentation](#)

### Add a Water Feature

Raindrops on foliage, and dew on the flowers can quench the thirst of many animals. But during dry season, a fountain, bird bath, bubbler, or pond of cool, clean water is a life-saver. Following the tips in [UF's article Providing Water to Wildlife](#) will bring plenty of free entertainment to a location near you.

### Concerts and Entertainment, but Free Security?

Our neighbors, the Mockingbirds, spend their days singing as they patrol our entire yard while shopping for groceries. Butterflies, hummingbirds, egrets, finches, even woodpeckers are welcome to share the buffet, but the blackbirds that love those cabbage palms and their fruits? The Mockingbirds' Neighborhood Watch Program is too vigilant for them, so they pass right on by. And as for us? You'll find us outside enjoying the show!

## A Memorable Master Gardener Collier Extension Year....

By 64 Master Gardeners

- \* Over 3,900 hours of volunteer service
- \* 13 MGs designed landscapes, and directed 600 Texas Roadhouse volunteers as they installed 2000 plants around 75 homes and 2 community centers during Immokalee Humanitarian Day
- \* 12 horticulture videos produced
- \* 10 Garden Workshop classes held
- \* 6 new Master Gardeners welcomed
- \* 6 area MG Plant Clinics operating
- \* 6 Green Gazette issues published
- \* 2 day Yard and Garden Show held
- \* Immokalee Humanitarian Day and Videography teams nominated for Florida State Master Gardener Project awards
- \* Dedication of Friends of Extension Garden Bench in memory of longtime Master Gardener Chuck Ray in HLC gardens
- \* Ag Tour, Farm City BBQ, Extension classes, and Pesticide Training exams supported

## Now Playing in SWFL Gardens

By Leah Ray, Master Gardener

As the song goes, "It's the most wonderful time of the year. It's the happiest season of all!" and I am not talking about the holidays. We're entering that time of year when gardening can be just so unbelievably pleasant. It's a time when we can actually catch up in the jungles we call our yards. Let's hope those cold winter blasts stall before they get to us this year, because I don't want to be singing the song from Madagascar- *I like to move it, move it. I likes to move it, move it!*"

**Bulbs:** Plant amaryllis in soil after they have bloomed in your home. The bulb will literally pull itself down into the ground year by year, so plant it high. See [UF article CIR1243 Amaryllis](#) for more information.

**Turf:** St. Augustine is best mowed at a height of FOUR inches. It will then shade out weeds, develop a deeper root system for more drought tolerance, and allow the grass to recover more quickly from damage. See [UF article ENH10 Mowing your Lawn](#). And refrain from watering **more than the turf needs during the winter**.

**Vegetables:** Plant cool season crops including beets, cabbage, turnips, lettuce, and broccoli. Get the free Guide! ([UF article SP103 FL Vegetable Garden Guide](#)).

**Herbs:** Best performing herbs are tarragon, thyme, dill, fennel, and all mints. [Read about these and many more in UF article CIR570 Herbs in the Florida Garden](#).

**Flowers:** Plants that thrive now include begonias, browallias, lobelias, dianthus, dusty millers, and nicotianas.

Amaryllis in bloom

Christmas Cactus with magnesium deficiency.

**Nutritional Deficiencies:** When cool weather arrives, some plant leaves may droop and even turn purple. Treat this magnesium deficiency with Epsom salts (magnesium sulfate). Mix 8 rounded tablespoons Epsom salts into 2.5 gallons of water. Add a drop or two of liquid detergent and spray plants.

**Cold Protection:** Tropical plants and summer annuals do not adapt or harden to withstand temperatures below freezing. Many are injured by temperatures below 50°F. But, our subtropical plants can harden or acclimate and withstand freezing temperatures. [UF article ENH1 Cold Protection of Ornamentals](#) explains what to do before, during, and after a freeze. Be sure to cover plants all the way to the ground. And follow [UF's Florida Automated Weather Network FAWN](#) for accurate weather information.

## Budding Opportunities

Collier County communities and organizations recognize the value of our Master Gardeners' knowledge and experience by requesting their assistance with garden projects. Here are a few of their most recent requests. Please [contact Peggy](#) at the Collier Extension Office 239 353 4244 to volunteer.

### Let's Grow Collier County Together!

- ☀ **[Collier County Fair Booth:](#)** Join [FL Nursery, Growers and Landscape Association \(FNGLA\)](#) members in answering gardening questions. Fair dates are March 15–25, 2012.
- ☀ **[Collier Extension Horticultural Learning Center Demonstration Rain Garden:](#)** Collaborate with other Master Gardeners to design and install a rain garden near Extension office parking area.
- ☀ **[Collier County Extension Plant Clinic:](#)** Assist residents who call, email or walk in with gardening questions. Openings on Monday afternoons or Fridays.

## Come Grow with Us!

Want to learn the latest tips for growing healthy edibles and vibrant landscapes? Willing to share your time and gardening knowledge with others in Collier County? Then become a Florida Master Gardener!

Since 2011 began, our 64 Collier County Master Gardeners have received over 400 hours of educational training, and provided over 3,100 hours of community service. You can learn more about the [Master Gardener Program](#) and the [roles of Master Gardeners](#) before requesting the [Collier County Master Gardener Program brochure](#).

Then call Peggy at the Collier County Extension Office at (239) 353-4244 for an application and training course registration materials.

Master Gardener Helga Reynolds with grower Frank DeNardis during [Tropical Fruit Tree video](#) production.

## SW Gulf & Garden Calendar

See [Collier Extension Calendar](#) for more details. All events held at Extension office unless noted. Call the Collier Extension at 239 353 4244 to register for all classes.

### December

- Dec 1** [December South FL Garden Calendar](#)
- Dec 10** [Rain Barrel Workshop](#), by UF/IFAS Lee County Extension, Rutenberg Eco Living Center, 6940 South Pointe Blvd., Fort Myers, 9:00–10:30 am. Cost \$ 45 for class and rain barrel. Advance registration required.

### January, 2012

- Jan 1** [January South FL Garden Calendar](#)
- Jan 5** First class of 10-hour [About Boating Safety course](#), by [Florida Fish & Wildlife Commission](#), Marco Island Sail and Power Squadron, 1114 N. Collier Blvd., Marco Island, 6:00 –8:00 pm. Remaining 2hr classes on 1/9, 1/12, 1/16, and 1/19. Free. [Contact Clifford Winings](#) at 239 394 2344 for details.
- Jan 12** [Garden Workshop Series Begins](#), Unity of Naples, 2000 Unity Way, 10:00–11:30 am. See page 3 for complete GWS schedule and details.
- Jan 13-15** [SW Florida Nature Festival](#). Presentations and over 40 field trips offered in multiple locations around SWFL. [Visit SW Florida Nature Festival](#) for more information, cost and registration information.
- Jan 18** [2012 Scientific Angler Series Begins](#) with [Big Fish Tales: Tagging and Tracking Goliath Grouper](#), by [FL Wildlife Commission's](#) Angela Collins, [Rookery Bay Environmental Learning Center](#), 300 Tower Rd., Naples, 6:30–8:30 pm. Free. [Contact Collier Sea Grant Agent Bryan Fluech](#) to register.
- Jan 20** [Florida Arbor Day](#). Celebrate by planting a tree in your yard or community.
- Jan 21** [Open House](#) at [UF/IFAS Fort Lauderdale Research and Education Center](#), 3205 College Ave., Fort Lauderdale, 10am–2 pm. Free.

### February

- Feb 1** [February South FL Garden Calendar](#)
- Feb 1** [Next Green Gazette newsletter](#)

## I say Papaya. You say Pawpaw. Let's just call it Delicious!!

*By Suzanne Fundingsland, Family Nutrition Program Agent*

Papayas are a great source of fiber and Vitamins A and C. They are free of fat, cholesterol, AND sodium. AND they're wonderfully high in potassium. So like many other fruits, papayas are just what the doctor ordered! There's so much good we can say about papayas. We'll just call them delicious.

This sweet melon-like fruit has a fruity fragrance. The skin is smooth and thin, changing from green to yellow or yellow to orange. The pulp color ranges from pale gold to deep orange-red. When buying papayas, look for those with smooth, unblemished skin that are at least half yellow, and yield to gentle pressure.

Let the papaya ripen at room temperature, about three days. When it's ripe you will notice a soft, fruity aroma. Refrigerate the ripe fruit, and use it within a week. One large papaya is about 2 servings. Two medium papayas weigh about a pound. A medium papaya will yield about  $\frac{3}{4}$  cup of cut-up fruit. As with any cut fruit, wash it before you slice it.

Add papaya to other tropical fruits for a salad, or to ice cream or frozen yogurt for a yummy milkshake. Cut the fruit in half and scoop out the seeds and strings. Peel the skin and slice the fruit – or enjoy it with just a little fresh lime juice right out of the shell!

It may be "winter" but on a warm Florida afternoon, this might taste pretty nice.

### **Papaya Milkshake**

1 papaya, seeded and cubed

1 Tablespoon honey

$\frac{2}{3}$  cup crushed ice

Puree everything in a blender until smooth. Enjoy!

### **Serves 4**

Juice of one lime

1 teaspoon vanilla

$\frac{1}{2}$  cup yogurt (try one of the new Greek types!)
